

A HOLISTICALLY UNIFIED RELATIONSHIP DIAGRAM

This relationship diagram illustrates a comprehensive, integrative, honoring approach. It can apply to any scale of human entity-ship: from the individual, family, commercial/corporate, community, institutional, educational, state, and national, to the multi-national or global.

See if you can construct one of your own for whatever scale of entity you wish to make more Earth-friendly. Start by identifying all the parts of your given entity. Then include them in your relationship diagram as a way of honoring their important presence in the complete whole. Then, you can focus on helping them all to work together more harmoniously, to reduce their negative effects on the Earth.
